Operating Agreement — TrueSight DAO LLC (Próspera ZEDE)

- **Document type:** Limited Liability Company Operating Agreement — the operative internal governing instrument ("By-Laws") of the Company
- **Entity:** TrueSight DAO LLC *(confirm exact spelling/suffix against the filed Certificate of Organization)*
- **Jurisdiction:** Próspera ZEDE, Roatán, Islas de la Bahía, Republic of Honduras
- **Entity form:** Limited Liability Company under the Roatán Common Law Code (RCLC), Div. 3, Chap. 7, § 3707 — Uniform Limited Liability Company Act ("ULLCA")
- **Status:** Operative — adopted as the Company's By-Laws / Operating Agreement
- **Version:** 1.0
- **Effective date:** 2026-07-01 (date merged Proposal #18 adopted this structure via the DAO Proposal Process)
- **Authorized by:** TrueSight DAO merged governance proposal #18 — *"Establish Legal Holding Entity for Brazil Export Operations"* (Path A — Próspera LLC), merged 2026-07-01. Structured as a partner-network coordination entity (no Company-owned Brazilian subsidiary); see Recitals and Article XI.

> **Adoption and effect.** These By-Laws constitute the Operating Agreement of **TrueSight DAO LLC** within the meaning of RCLC § 3707 (ULLCA) and are the **binding internal governing instrument** of the Company. They are adopted by the Members through the DAO Proposal Process (Article VIII), pursuant to merged Proposal #18, and bind the Company, its Members, Governors, and officers as of the Effective Date (2026-07-01, the date Proposal #18 was merged). Bracketed `[…]` items are registry/filing particulars to be completed on execution. Where any provision conflicts with mandatory Próspera law, that law controls and the remainder stays in effect (Article IV; § 20.7).

Recitals

WHEREAS, TrueSight DAO ("the DAO") is a values-driven, ledger-first community whose purpose is *to heal the world with love*, whose concrete mission is *to restore 10,000 hectares of Amazon rainforest*, and whose core values are **Mindfulness, Compassion, and Equanimity** (TrueSight DAO Whitepaper, §"Who are we" / "North star");

WHEREAS, the DAO operates the **Agroverse** initiative — a regenerative-agriculture trade bridge that moves verified cacao and agroforestry produce from small-scale Northern-Brazilian farming cooperatives and producers to conscious buyers abroad — and, as a separate initiative, the **SunMint** regenerative-finance (ReFi) / carbon-sequestration program;

WHEREAS, the Company is organized as a Próspera ZEDE coordination and trade entity that contracts with an independent network of partners, rather than owning them: on the **origin (Brazil) side**, the Company's **Export Partners** — including **Black King** (Matheus Reis Pereira), **Coopercabruca**, and **CEPOTX** — supply and export produce under their own Brazilian registrations (CNPJ, RADAR/Siscomex); on the **destination (United States) side**, the Company's **U.S. Import Partner**, **TrueTech Inc** (a Delaware C-corporation; EIN 88-3411514; U.S. Customs importer-of-record 88-341151400; FDA FSVP importer of record), imports and distributes; each partner is a distinct legal person under its own jurisdiction and none is a subsidiary of the Company;

WHEREAS, on 2026-07-01 the DAO's General Assembly, through its GitHub-and-digital-signature governance process, **merged Proposal #18** authorizing the incorporation of this Próspera ZEDE entity to coordinate, finance, and book the Agroverse trade flow and to operate a triangular trade structure (Brazil Export Partners → Company (Próspera) → U.S. Import Partner); the Members adopt the looser **partner-network** structure set out herein in lieu of a Company-owned Brazilian subsidiary, thereby avoiding the unresolved foreign-quotaholder question flagged for counsel in `BRAZIL_EXPORT_ENTITY_BRIEF.md`;

WHEREAS, the Members wish to organize that company as a Próspera limited liability company under RCLC § 3707 (ULLCA) and to govern it, to the maximum extent permitted by Próspera law, in a manner faithful to the DAO's existing constitution — its **TDG ledger**, its **Governors**, its **General Assembly** / **Town Hall**, and its **GitHub-based, digitally-signed proposal process**;

NOW, THEREFORE, the Members adopt this Operating Agreement as the governing internal instrument ("by-laws") of the Company.

Article I — Definitions

1.1 **"Company"** — TrueSight DAO LLC, the Próspera ZEDE limited liability company governed by this Agreement.

1.2 **"DAO"** / **"TrueSight DAO"** — the unincorporated TrueSight DAO community whose canonical governance handbook is the TrueSight DAO Whitepaper published at `truesight.me/whitepaper/`, as amended by merged proposals in `github.com/TrueSightDAO/proposals`.

1.3 **"TDG"** — TrueSight DAO Governance Tokens, the accounting units recorded on the Main Ledger (defined below) and issued per the Rubric. TDG are ledger entries, not on-chain tokens.

1.4 **"Main Ledger"** — the canonical TrueSight DAO Google Sheet at spreadsheet ID `1GE7PUq-UT6x2rBN-Q2ksogbWpgyuh2SaxJyG_uEK6PU`, including its **Contributors contact information**, **Governors**, **Currencies**, and **offchain transactions** tabs, together with any successor system of record adopted by DAO vote.

1.5 **"Rubric"** — the DAO's contribution-scoring schedule (`truesight.me/rubric`): 100 TDG per hour of human labor; 1 TDG per USD of liquidity injected; ±1 TDG per USDT received/sent.

1.6 **"Membership Units"** / **"Units"** — the limited liability company interests of the Company, allocated to Members in proportion to TDG held as of the applicable Snapshot (Article V).

1.7 **"Member"** — a person or entity admitted to membership and holding one or more Units, recorded on Schedule A.

1.8 **"Governor"** — a natural person seated on the DAO **Governors** tab under the Governors Formula (§7.2), i.e., ranked within the top ten (10) contributors by total TDG issued over the trailing one hundred eighty (180) days, excluding passive USDT-flow lines.

1.9 **"Governor Board"** / **"Board"** — the Company's board of managers under RCLC § 3707, composed of the seated Governors ex officio, re-seated each Seating Date (§7.3). It is the "manager" of this manager-managed LLC.

1.10 **"Seating Date"** — each Spring Equinox, Summer Solstice, Autumn Equinox, and Winter Solstice (≈ every 90 days), on which the Governor Board is automatically re-constituted from the then-current Governors tab.

1.11 **"Managing Member"** / **"President"** — the continuity officer and principal authorized signatory of the Company (initially Gary Teh / Zhiwen Teh), holding the powers in Article XII; the office changes only by Member vote, not on a Seating Date.

1.12 **“General Assembly”** / **“Town Hall”** — the DAO’s deliberative body of qualifying TDG holders, exercising Member voting rights of the Company through the Proposal Process.

1.13 **“Proposal Process”** — the DAO’s constitutional decision procedure: proposals created and voted via digital signatures in the DApp, recorded as pull requests in `github.com/TrueSightDAO/proposals`; a majority-YES vote over the voting period merges the PR (approved) and a majority-NO closes it (rejected) (Proposals #12 and #15).

1.14 **“NAV”** — net asset value per Unit, computed as total Company assets divided by total Units outstanding, published as a formula on `truesight.me`.

1.15 **“AGL”** — Agroverse Guild Ledger, a managed sub-ledger for shipment financing or operational funds.

1.16 **“Export Partners”** — the independent Brazilian producers, cooperatives, and exporters that supply and export Agroverse produce under their own Brazilian registrations (CNPJ, Inscrição Estadual, RADAR / Portal Único Siscomex, NF-e), including **Black King** (Matheus Reis Pereira, CNPJ 50.042.585/0001-80), **Coopercabruca** (Cooperativa dos Cacauicultores do Sul da Bahia, CNPJ 31.948.811/0001-42), and **CEPOTX** (Coop. Central de Produção Orgânica da Transamazônica e Xingu, CNPJ 22.568.369/0001-38), and any further partners the Board admits. Export Partners are counterparties, **not** subsidiaries, employees, or agents of the Company.

1.17 **“U.S. Import Partner”** — **TRUETECH INC**, a Delaware C-corporation (EIN 88-3411514; U.S. Customs importer-of-record 88-341151400; FDA FSVP importer of record; DAO technology solutions provider), which imports and distributes Agroverse produce in the United States as an independent counterparty of the Company, and any additional destination-market Import Partner (e.g., China, Europe) the Board admits.

1.17A **“Trade Partners”** — collectively, the Export Partners and the Import Partner(s).

1.18 **“RCLC”** — the Roatán Common Law Code as adopted within Próspera ZEDE; **“ULLCA”** — RCLC § 3707; **“Entity Registry Statute”** — the Próspera Entity Registry Statute and RCLC Entity Code; **“Tax Statute”** — the Próspera Tax Statute 2019 (§ 2-1-38-1-0-0-1).

Article II — Formation, Name, Registered Agent, and Offices

2.1 **Formation.** The Company is formed as a limited liability company upon the filing of its Certificate of Organization with the Próspera Entity Registrar under the Entity Registry Statute and RCLC § 3707. The Members ratify that filing and adopt this Agreement as the Company’s operating agreement within the meaning of ULLCA.

2.2 **Name.** The name of the Company is **TrueSight DAO LLC**. Any trade or commercial name shall be filed under the **Próspera Commercial Name Statute** (§ 2-1-239-0-0-0-1). The Company shall not use a name indistinguishable from another registered entity absent the required consent filing.

2.3 **Registered agent and registered office.** The Company shall continuously maintain a registered agent and registered agent office within Próspera ZEDE as required by the Entity Registry Statute. Initial registered agent: `[REGISTERED AGENT NAME]`; registered office: `[PRÓSPERA REGISTERED OFFICE ADDRESS]`. Changes are effected by a Statement of Change of Registered Agent/Office filed with the Registrar.

2.4 **Principal office; virtual operation.** The Company’s principal place of business may be maintained electronically. The Company is expressly organized to be operated substantially through digital means and by authorized software agents, consistent with RCLC § 3801 (Uniform Electronic Transactions Act) and § 3510 (UCC Article 12, Controllable Electronic Records).

2.5 **Duration.** Perpetual, unless dissolved under Article XIX.

2.6 **Registrations abroad.** The Company shall register or qualify abroad only as needed to transact with its Trade Partners (e.g., a foreign-investor/RDE registration or a resident representative in Brazil if and where required to remit payments or hold contractual rights, and any U.S. filing needed to contract with the Import Partner). The Company does **not** acquire, own, or control any Brazilian operating entity; the Export Partners hold their own foreign-trade credentials (RADAR / Siscomex / NF-e).

Article III — Purpose, Mission Alignment, and Powers

3.1 **Purpose.** The Company is organized to: (a) coordinate and contract with an independent network of Trade Partners — Brazilian Export Partners on the origin side and the U.S. (and future) Import Partner(s) on the destination side — without owning them; (b) finance, coordinate, and book the trade of cacao and agroforestry produce from Northern Brazil (Bahia, Pará, and expansion regions) to buyers abroad, beginning with the United States via the U.S. Import Partner, and prospectively China and Europe; (c) operate the triangular trade structure authorized by Proposal #18 (Export Partners → Company (Próspera) → Import Partner), booking profit at the Company layer under the Próspera tax regime, on arm's-length terms; (d) hold treasury assets, administer the TDG-linked NAV buy-back reserve, and support Agroverse and SunMint program objectives; and (e) do all things a Próspera LLC may lawfully do incident to the foregoing.

3.2 **Mission covenant.** Every material decision of the Company shall be evaluated against the DAO's North Star — whether it advances the restoration of 10,000 hectares of Amazon rainforest in service of healing — and against the DAO's core values of Mindfulness, Compassion, and Equanimity. This covenant is interpretive and aspirational; it does not create third-party rights or override the managers' duties under §3.3.

3.3 **Powers and standard of conduct.** The Company has all powers of a limited liability company under ULLCA. Managers and the Managing Member shall discharge their duties consistent with the duty of loyalty and duty of care as modified by this Agreement to the extent ULLCA permits such modification, and shall at all times observe the human-rights baseline of the Próspera Charter (Art. 14) and applicable RCLC standards.

3.4 **Regulated-activity limitation.** The Company shall not conduct any activity reserved to licensed financial-service providers under the Roatán Financial Services Authority (RFSA) framework (e.g., banking, money transmission, public securities offerings, custody/brokerage of financial instruments) unless and until duly licensed or exempt. TDG and Units shall be administered as internal membership/governance interests and not offered to the public as securities absent compliant structuring (see §5.6 and Article XVII cross-reference to counsel questions).

Article IV — Normative Hierarchy and Governing Law

4.1 **Controlling law.** This Agreement is governed by the law applicable within Próspera ZEDE, in the following order of precedence (Prospera ZEDE Rules, Art. 8): 1. the Honduran Constitution (sovereignty, territory, justice, defense, foreign relations, elections, ID/passport); 2. international treaties ratified by Honduras; 3. the Organic Law of the ZEDEs; 4. specific national laws listed in the Organic Law's final provisions; and 5. Próspera ZEDE's internal rules (the Charter, the RCLC, statutes, resolutions, and administrative actions).

4.2 **Supremacy of mandatory law.** Where any provision of this Agreement conflicts with mandatory Próspera law, the mandatory law controls and the remaining provisions stay in effect (severability, §20.7).

4.3 **DAO constitution as internal contract.** The DAO Whitepaper and merged proposals are incorporated as the Members' bargained-for internal governance expectations. They bind the Members and managers as a matter of contract *inter se*, but do not displace mandatory Próspera law or the rights of third parties.

4.4 **Human-rights floor.** Nothing in this Agreement shall be construed to authorize any act inconsistent with the constitutional and Charter human-rights protections that Próspera law requires all internal rules to uphold or exceed (Art. 14; Próspera Human Rights Defense Committee, § 5-1-215).

Article V — Membership and Units

5.1 **Members = TDG holders.** The Members of the Company are the natural persons and entities recorded on the Main Ledger's *Contributors contact information* tab holding a non-zero TDG balance as of the applicable Snapshot, who have completed the admission requirements of §5.4.

5.2 **Units proportional to TDG.** Membership Units are allocated in proportion to each Member's TDG as of the Snapshot. Illustratively (Brazil Export Entity Brief snapshot, 2026-05-26): 316 contributors held ≈ 2,263,640 TDG. Schedule A records the Units of each Member at the current Snapshot.

5.3 **Snapshot mechanics.** Ownership of record is fixed by periodic **Snapshots** taken on each Seating Date (or on such other cadence as the General Assembly sets by Proposal). Between Snapshots the register is fixed for legal purposes even though the underlying ledger updates continuously. New contributors admitted at the next Snapshot; departures and burns reflected likewise.

5.4 **Admission conditions.** Admission as a Member of record requires: (a) a registered DAO digital signature (public key on file per the DApp identity flow); (b) satisfaction of KYC/beneficial-ownership information the Company reasonably requires for Próspera, Brazilian, and banking compliance; and (c) acceptance of this Agreement (electronic acceptance sufficient, Article XV).

5.5 **1 Unit = 1 vote on entity matters; DAO weighting for DAO matters.** For statutory acts requiring a Member vote *at the Company level* under ULLCA, voting is one-Unit-one-vote (consistent with Proposal #18's "1 share = 1 vote"). For matters routed through the DAO Proposal Process (Article VIII), the DAO's own vote-weighting and eligibility rules apply. Where a matter is both, §8.5 governs reconciliation.

5.6 **Nature of Units; transfer restrictions.** Units are internal governance/economic interests tied to sweat-equity and capital contributions, not instruments offered to the public. Units are **non-transferable** except: (a) by NAV redemption to the Company (Article IX); (b) by operation of the Snapshot re-allocation; or (c) with Board approval and compliance with applicable securities analysis (see counsel questions, LEGAL_ENTITY_STRUCTURING_PROPOSAL_v2.md). No public market for Units is created or endorsed.

5.7 **No personal liability.** No Member, Governor, Manager, or officer is personally liable for the debts, obligations, or liabilities of the Company solely by reason of being such, consistent with ULLCA and the Próspera Liability Shield Resolution (§ 5-1-183).

Article VI — Capital Contributions

6.1 **Forms of contribution (per Rubric).** Contributions are recognized as (a) **labor** / **sweat equity** (100 TDG per hour), (b) **provided funds** (1 TDG per USD of liquidity injected), and (c) in-kind resources as scored by the DAO. All contributions are scored by Edgar, reviewed by Governors, and consolidated to the Main Ledger around solstices/equinoxes.

6.2 **No obligation to contribute further.** No Member is obligated to make additional contributions; dilution follows naturally from others' contributions via the Snapshot mechanism.

6.3 **Fiat injection routing.** External fiat capital intended to finance operating expenses is handled through the designated holding vehicle(s) so as not to distort the contribution/token balance (DAO Fiat Injection policy,

2023-06-28), and, going forward, may be booked in the Company or TrueTech Inc as the Board directs consistent with the triangular structure.

6.4 **Capital accounts.** The Company shall maintain capital-account records reconciled to the Main Ledger and to the Company's financial books (Article XIII).

Article VII — Governance: The Governor Board (Rotating, 90-Day)

7.1 **Manager-managed.** The Company is manager-managed under ULLCA. The manager is the **Governor Board**.

7.2 **Governors Formula.** The Board is composed, ex officio, of the natural persons seated on the Main Ledger *Governors* tab, which ranks every contributor by total TDG issued over the trailing 180 days (excluding the passive lines "1 TDG for every 1 USDT received" and "–1 TDG for every 1 USDT sent") and seats the top ten (10). There is no campaigning and no self-nomination; the only path onto the Board is sustained contribution.

7.3 **Rotation / re-seating (the 90-day board).** The Board is **automatically re-constituted on each Seating Date** (Spring Equinox, Summer Solstice, Autumn Equinox, Winter Solstice — ≈ every 90 days) to match the then-current Governors tab. A person who leaves the top-ten ranking ceases to be a Manager as of the Seating Date; a person who enters the top ten becomes a Manager as of the Seating Date. The daily-sliding ledger determines *eligibility*; the Seating Date determines *legal seating*, providing a stable quarterly board of record for third parties.

7.4 **Continuity safeguards (the carve-out).** To preserve banking, customs, and counterparty continuity notwithstanding rotation: (a) the **Managing Member / President** (Article XII) is a separate, non-rotating office and remains the principal authorized signatory across Seating Dates; (b) authorizations, powers of attorney, banking mandates, and any resident-representative appointments the Company holds for transacting with its Trade Partners survive re-seating until expressly revoked; and (c) the outgoing Board shall deliver a written handoff (open matters, authorizations, pending Proposals) to the incoming Board within 15 days of each Seating Date.

7.5 **Board authority.** Subject to matters reserved to the Members/General Assembly (§8.4), the Board manages the business and affairs of the Company: approves budgets and AGL terms, negotiates and oversees Trade Partner agreements (Export Partners and the U.S. Import Partner) and the triangular trade terms, administers the buy-back reserve, appoints/removes officers, and executes the DAO's merged proposals at the entity level.

7.6 **Meetings and action.** The Board acts by majority of seated Governors. Meetings may be held electronically; action without a meeting is valid if evidenced by digitally-signed consents of a majority (Article XV). A quorum is a majority of then-seated Governors.

7.7 **Duties.** Governors owe the Company the duties of care and loyalty as modified by this Agreement to the extent ULLCA permits, must avoid undisclosed conflicts, and must uphold the human-rights floor (§4.4). Governors' DAO duties (reviewing Edgar-scored submissions each season; resolving notarization disputes) continue and inform their Company oversight.

7.8 **Vacancies / insufficient Governors.** If fewer than three Governors are seatable, the Managing Member shall convene the General Assembly to fill the Board by Proposal pending the next Seating Date.

Article VIII — Members, General Assembly, and Voting

8.1 **General Assembly.** Member action is exercised through the DAO's General Assembly / Town Hall, comprising qualifying TDG holders under the DAO's access rules (e.g., ≥100 TDG and recent contribution activity — Whitepaper amendments 2023-09-21A–D).

8.2 **Proposal Process is the voting mechanism.** Member votes at both the DAO and Company level are cast through the **Proposal Process**: digitally-signed submissions via the DApp recorded as pull requests in `github.com/TrueSightDAO/proposals`, tabulated over the voting period, merged on majority-YES and closed on majority-NO (Proposals #12, #15). This is the Company's recognized method of obtaining Member consent under ULLCA and RCLC § 3801 / § 3510.

8.3 **Digital signatures = valid consent.** A digitally-signed vote or consent that verifies against a Member's registered public key constitutes that Member's signature and vote for all purposes of ULLCA and the Entity Registry Statute (Article XV).

8.4 **Reserved matters (Member approval required).** The following require approval through the Proposal Process (majority-YES unless a higher threshold is stated), in addition to any Board action: (a) amendment of this Agreement or the Certificate of Organization (Article XVIII); (b) merger, conversion, domestication, or dissolution; (c) changing the NAV buy-back policy, the Rubric exchange rates, or the AGL fee standard; (d) issuing Units other than by the Snapshot mechanism, or creating any new class of interest; (e) terminating or materially restructuring the relationship with a principal Trade Partner (e.g., the U.S. Import Partner, or an Export Partner representing a material share of trade flow); (f) admitting external equity investors into the Company; and (g) any matter the Board refers to the Members.

8.5 **Reconciliation of entity vote vs. DAO vote.** Where a reserved matter is also a statutory act requiring a one-Unit-one-vote tally under ULLCA, the Managing Member shall run both tallies; the action passes only if it satisfies **both** the DAO Proposal Process outcome and the ULLCA one-Unit-one-vote threshold. Absent conflict, the Proposal Process outcome governs.

8.6 **Record of Member action.** Merged proposals and their digitally-signed vote records are the Company's minute book for Member action and are incorporated into Schedule C as they accrue.

Article IX — Distributions and NAV Buy-Back / Redemption

9.1 **Distributions discretionary.** Distributions, if any, are declared by the Board consistent with the DAO's treasury policy and Próspera solvency/financial-responsibility rules (Próspera Financial Responsibility Statute, § 2-2-76). No Member has a right to a distribution except as declared.

9.2 **Ledger-based buy-back reserve.** Consistent with **Proposal #14** (migration away from Raydium toward a ledger-based buy-back program), the Company maintains a USD buy-back reserve recorded on the ledger, funded by budget the DAO allocates and by surplus routed from operations (including TrueTech Inc subscription/licensing surplus that boosts NAV).

9.3 **Redemption at NAV.** A Member may request redemption ("withdraw voting rights") through the DApp; the reserve is debited and the corresponding TDG/Units are burned at the then-current NAV, subject to available reserves. Buy-backs are **discretionary, not guaranteed**; if reserves are insufficient, redemptions queue and fill as revenue arrives (LEGAL_ENTITY_STRUCTURING_PROPOSAL_v2.md, "Buyback Capacity"). This mirrors Proposal #18's "shares sold back to the company at NAV."

9.4 **Early-exit penalty for managed-ledger equity.** Where a Member holds an equity position in a managed AGL and exits prematurely, that managed-ledger position is reclaimed at a significant discount to the initial contribution, as a penalty for early exit. This penalty applies to managed-ledger equity only, **not** to governance Units earned for contributions (Whitepaper, Treasury §).

Article X — AGL Shipment Financing and the 20% Fee

10.1 **Standard fee.** For all **future** AGL contracts that are **shipment financing** (direct shipment with physical collateral), the default DAO fund-management fee is **20%** of post-recoup profit, unless a specific contract states otherwise (**Proposal #17**, merged 2026-02-24; Agroverse Whitepaper, Tokenomics §).

10.2 **No double-charging. Operational-fund** AGLs (ledgers that invest in other AGLs) charge **0%** at that layer, because the underlying AGLs already bear the 20% fee.

10.3 **Financier options.** A shipment financier may (a) hold for profit — capital repaid first, remaining profit split 80% financier / 20% DAO — or (b) exchange the position for the physical inventory it represents, bearing shipping cost and the DAO management fee on cost of goods (Agroverse Whitepaper, Role 0).

10.4 **Existing contracts.** Contracts predating Proposal #17 keep their prior terms unless amended by mutual agreement.

10.5 **Securities note.** The AGL shipment-financing pattern may raise a separate securities question (Reves promissory-note / investment-contract analysis) distinct from the Units analysis; the Board shall structure AGL offerings on advice of counsel and within any applicable RFSA exemption.

Article XI — Trade Partner Network and Triangular Trade Structure

11.1 **Partner network, not ownership.** The Company operates through a network of **independent Trade Partners** and does **not** own, control, or consolidate any of them. Each Export Partner (Black King, Coopercabruca, CEPOTX, and future partners) is a Brazilian legal person holding its own foreign-trade credentials (CNPJ, Inscrição Estadual, RADAR / Portal Único Siscomex, NF-e); the U.S. Import Partner (TrueTech Inc) is an independent Delaware corporation. In the eyes of the Honduran/Próspera authorities, these are the Company's contractual counterparties on the origin and destination sides, respectively.

11.2 **Partner agreements.** The Company contracts with each Trade Partner on arm's-length terms via written partner/supply/purchase agreements (which may be digitally signed, Article XV). Such agreements define pricing, quality, delivery, evidence/traceability, and, where applicable, the AGL shipment-financing terms (Article X). No agreement shall characterize a Partner as a subsidiary, employee, or general agent of the Company.

11.3 **Triangular trade.** Trade flows Export Partner (Brazil) → Company (Próspera) → Import Partner (US) → retailers, with profit booked at the Company layer under the Próspera regime, structured on arm's-length terms and to comply with Brazilian and U.S. cross-border/transfer-pricing rules (Brazil Export Entity Brief, §5). Because the Company transacts as a purchaser/reseller rather than as a quotaholder, it avoids the foreign-ownership question raised for a Company-owned Ltda.

11.4 **FSVP and traceability continuity.** TrueTech Inc remains the U.S. FDA-FSVP and Customs importer of record; the Company and its Export Partners shall preserve supplier verification, FDA Food Facility Registrations, and traceability documentation for Coopercabruca, CEPOTX, Black King, and other verified suppliers (`github.com/TrueSightDAO/fda_fsvp`).

11.5 **Partner admission and removal.** The Board may admit or remove Trade Partners in the ordinary course; admitting a Partner does not make it a Member of the Company, and a Member's status as a Partner (or a Partner's principal being a Member) does not enlarge that Member's Units. Related-party dealings (e.g., where a Partner's principal is also a Member or Governor) shall be disclosed and approved consistent with §7.7 (conflicts).

11.6 **Additional markets.** China and Europe Import Partners may be added by Board action within the purposes of §3.1.

Article XII — Managing Member, Officers, and Authorized Signatories

12.1 **Managing Member** / **President.** The initial Managing Member and President is **Gary Teh (Zhiwen Teh)** (Brazilian CPF [redacted]; President of TrueTech Inc). The office is the Company's continuity signatory and does not rotate on Seating Dates; it changes only by reserved-matter Member vote (§8.4) or by resignation/ incapacity.

12.2 **Authority.** The Managing Member executes contracts, banking mandates, customs and Siscomex filings, tax filings, and Registry filings; may appoint attorneys-in-fact and authorized software agents; and carries out Board and Member decisions. Material commitments outside the ordinary course require Board approval.

12.3 **Other officers.** The Board may appoint a Treasurer/Secretary and other officers, and may delegate defined authority to named software agents operating under logged, revocable credentials.

12.4 **Authorized software agents.** Consistent with §2.4 and Article XV, the Company may authorize automated agents to perform ministerial and pre-approved acts; every automated act is attributable to the Company and subject to Board oversight and audit.

Article XIII — Books, Records, Ledger, and Transparency

13.1 **System of record.** The Main Ledger is the DAO's system of record for contributions, TDG balances, currencies, inventory, governors, and shipments; the Company's statutory financial books reconcile to it.

13.2 **Transparency.** The Company embraces the DAO's transparency norm: governance (merged proposals), treasury (NAV formula, buy-back reserve), and supply-chain data are published on DAO surfaces (`truesight.me`, advisory snapshot, Beer Hall feed) to the extent consistent with confidentiality (Article XVI) and law.

13.3 **Records access.** Members may inspect Company records to the extent ULLCA requires, subject to confidentiality and the NDA regime (§16.1).

13.4 **Audit trail.** Ledger rows may be mirrored to the DAO's private TrueChain for tamper-evidence; this is an internal control, not a public securities register.

Article XIV — Tax Matters

14.1 **Próspera tax regime.** The Company is subject to Próspera Business Income Tax at an effective **1%** of business income (Tax Statute 2019; Overview of Taxation), due April 30 annually, plus Retail VAT (effective 2.5%) only on final retail sales made within Próspera's spatial competence, if any. Próspera imposes no capital-gains, import/export duty, payroll, or withholding beyond those specified by the Tax Statute (see BPN No. 8 for extraterritorial-investment treatment).

14.2 **Filings and payment.** Filings and payment are made via the e-Próspera platform; qualifying cryptocurrencies are accepted (§ 5-1-139; RFSA AA No. 10 — cryptocurrencies as monetary instruments).

14.3 **Cross-border.** Each Trade Partner is responsible for its own Brazilian or U.S. tax obligations; the Company's purchase/resale pricing with its Partners is documented at arm's length per §11.2. Nothing here is tax advice; the Board shall obtain qualified cross-border tax counsel.

14.4 **BTC/crypto unit-of-account.** The Company may keep books or denominate obligations in BTC or qualifying crypto where lawful (RFSA framework; Tax Commissioner BPN No. 9 — BTC as unit of account).

Article XV — Digital Signatures and Electronic Records

15.1 **UETA** / **UCC-12 validity.** Electronic records and electronic/digital signatures have the same legal effect as writings and manual signatures under RCLC § 3801 (UETA) and § 3510 (UCC Article 12 — Controllable Electronic Records). The Members intend all Company governance to be conductable electronically.

15.2 **DAO key = binding signature.** A submission (vote, consent, resolution, or filing authorization) that cryptographically verifies against a person's registered DAO public key is that person's authenticated signature and act for the Company, the Registrar, and third parties relying in good faith.

15.3 **Registrar filings.** Where the Registrar or a counterparty requires a manual or notarized signature, the Managing Member shall provide it; the electronic governance record remains the internal source of authority.

Article XVI — Confidentiality, Intellectual Property, and Non-Compete

16.1 **NDA** / **proprietary data.** Members accessing guild/operational material are bound by the DAO NDA and, where applicable, licensing and non-compete terms (Whitepaper amendments 2023-04-17, 2023-05-08). Contributors of private data retain their own rights to it per the NDA.

16.2 **Commercialization outside scope.** A Member wishing to commercialize DAO proprietary data outside DAO scope must enter the DAO licensing agreement.

16.3 **IP ownership.** Operational IP (Edgar, DApp, Oracle, QR/inventory systems, Sentiment Importer) is held/licensed as the DAO has arranged (substantially via TrueTech Inc); this Agreement does not transfer that IP to the Company except as the Board and Members expressly resolve.

16.4 **Enforcement.** Consistent with the DAO's practice, remedies for breach may be pursued under the applicable agreement's chosen forum; disputes touching this Company default to Article XVII.

Article XVII — Dispute Resolution

17.1 **Próspera Arbitration.** Any dispute arising under this Agreement or the Company's affairs shall be resolved by arbitration under the **Próspera Arbitration Statute 2019** (§ 2-1-37) administered by the **Próspera Arbitration Center** (`pac.hn`), seated in Próspera ZEDE, conducted in English (with Spanish translation as required), by one arbitrator unless the amount in controversy warrants three.

17.2 **Internal escalation first.** Members shall first use the DAO's internal dispute path where applicable — e.g., a contributor's right to surface a scoring/notarization dispute to the Town Hall for General Assembly vote (Whitepaper, Dispute resolution §) — before commencing arbitration on governance-scoring matters.

17.3 **Governing substantive law.** The RCLC and Próspera statutes govern; the Restatements and Uniform Acts adopted into the RCLC (e.g., Contracts, Agency, LLC Act) supply the rules of decision.

17.4 **Human-rights forum.** Nothing forecloses recourse to the Próspera Human Rights Defense Committee for matters within its competence.

Article XVIII — Amendments

18.1 **Amendment via Proposal Process.** This Agreement and the Certificate of Organization are amended through the DAO **Proposal Process** (digitally-signed proposal → PR in `TrueSightDAO/proposals` → majority-YES merge), subject to the one-Unit-one-vote reconciliation of §8.5 for statutory acts.

18.2 **Registry filings.** Amendments requiring Registrar filing (e.g., Amendment to Certificate of Organization, change of registered agent) are filed by the Managing Member after the merge.

18.3 **Conformity.** No amendment may cause the Company to violate mandatory Próspera law or the human-rights floor; any such provision is void to that extent (§20.7).

18.4 **Incorporated proposals.** Merged governance proposals affecting the Company are appended to Schedule C and take effect at the Company level upon merge, without need for restatement, except where a Registry filing is required.

Article XIX — Dissolution and Winding Up

19.1 **Triggers.** The Company dissolves upon (a) a reserved-matter Member vote to dissolve; (b) entry of a judicial/administrative dissolution; or (c) an event making its purpose unlawful or impossible.

19.2 **Winding up.** The Managing Member (or a Board-appointed liquidator) winds up: satisfies creditors, settles open balances with Trade Partners and any intercompany positions, and distributes any surplus to Members in proportion to Units at the final Snapshot, after the buy-back reserve and managed-ledger obligations are addressed.

19.3 **Filings.** Articles of Dissolution and any Statement of Withdrawal of foreign registrations are filed with the Registrar and any relevant Brazilian/U.S. authorities.

Article XX — Miscellaneous

20.1 **Limited liability & indemnification.** The Company shall indemnify Governors, the Managing Member, and officers to the fullest extent ULLCA and the Próspera Liability Shield Resolution permit, for acts in good faith within their authority; no indemnity for fraud, willful misconduct, or human-rights violations.

20.2 **Related entities.** The Company and each of its Trade Partners (the Export Partners and TrueTech Inc) are distinct legal persons; none is a subsidiary or agent of the Company; this Agreement does not merge them, and all dealings among them are at arm's length.

20.3 **No public offering.** Nothing here constitutes an offer of securities to the public; Units and TDG are internal interests (§3.4, §5.6).

20.4 **Notices.** Notices are valid if delivered electronically to a Member's registered DAO contact/public key.

20.5 **Language.** Executed in English; a Spanish translation may be filed where the Registrar requires (La Gaceta publication applies only to rules requiring congressional approval, not to private entity instruments).

20.6 **Entire agreement.** This Agreement, its Schedules, the Certificate of Organization, and incorporated merged proposals constitute the entire governance instrument of the Company.

20.7 **Severability.** If any provision is invalid under mandatory Próspera law, it is reformed to the minimum extent necessary and the remainder stays in effect.

20.8 **Counterparts / electronic execution.** May be executed in counterparts and by digital signature (Article XV).

Signature Block

Adopted by the Members of **TrueSight DAO LLC** through the TrueSight DAO Proposal Process and executed by the authorized signatory:

- **Managing Member / President:** ____ Gary Teh (Zhiwen Teh) — CPF [redacted]
- **On behalf of the Governor Board (seated Governors as of [SEATING DATE]):** digitally-signed consent record — PR `[proposals PR # adopting this Agreement]`
- **Date:** _____
- **Registered agent acknowledgment:** ____

Schedule A — Members and Units (Snapshot)

Snapshot date: `[SEATING DATE]`. Source: Main Ledger *Contributors contact information* / TDG balances. (Illustrative top holders per Brazil Export Entity Brief, 2026-05-26; complete at filing.)

#	Member	TDG	Units	Ownership %
1	Gary Teh	955,459	[=TDG]	40.77%
2	Garis Pang	67,653	[=TDG]	2.89%
3	Fatima Toledo	65,853	[=TDG]	2.81%
4	Val Lapidus	62,143	[=TDG]	2.65%
5	Jacob Nelan	60,726	[=TDG]	2.59%
…	+311 more contributors	…	…	…
—	**Total**	≈2,263,640	—	100%

Schedule B — Governor Board Seating

Seated automatically each Seating Date from the Main Ledger *Governors* tab (top 10 by trailing-180-day TDG, excluding passive USDT lines). Current seating as of `[SEATING DATE]`:

Seat	Governor	Trailing-180-day TDG rank
1–10	[auto-populated from Governors tab]	

Managing Member/President (non-rotating): Gary Teh.

Schedule C — Incorporated DAO Governance Record

Proposal / Source	Effect at Company level
Whitepaper (`truesight.me/whitepaper/`)	Mission, values, Governors, General Assembly, Rubric, Treasury/NAV
Agroverse Whitepaper	Purpose, roles, financier options, 20% fee, FSVP/ triangular trade
SunMint PDD	Carbon/ReFi program objectives, safeguards (FPIC, no forced/child labor)
Proposal #12 (2025-09)	GitHub proposal system = amendment/voting mechanism
Proposal #14 (2025-09)	Ledger-based NAV buy-back reserve (Article IX)
Proposal #15 (2025-10)	Contribution submissions via DApp
Proposal #17 (2026-02)	20% AGL shipment-financing fee standard (Article X)
Proposal #18 (2026-07)	Authorizes this Próspera LLC + triangular trade + NAV share buyback (adapted here as a **partner-network** structure — no Company-owned Brazilian subsidiary)

Appendix — Próspera Legal Basis Map (for counsel)

Article	Próspera / RCLC authority
Entity form, formation	RCLC § 3707 ULLCA; Entity Registry Statute; RCLC Entity Code
Name / trade name	Próspera Commercial Name Statute § 2-1-239
Normative hierarchy	Prospera ZEDE Rules Art. 8; Charter
Human-rights floor	Charter Art. 14; Human Rights Defense Committee § 5-1-215
Liability shield / indemnity	Próspera Liability Shield Resolution § 5-1-183
Digital signatures / e-records	RCLC § 3801 (UETA); § 3510 (UCC Art. 12)
Contracts / agency / trusts rules of decision	RCLC § 3300, § 3404, § 3405
Trade Partner agreements (arm's-length purchase/resale, not ownership)	RCLC § 3300 (Contracts); § 3501 et seq. (UCC Art. 2/2A sales & leases); § 3404 (Agency — to confirm Partners are counterparties, not agents)
Tax	Próspera Tax Statute 2019 § 2-1-38; Overview of Taxation (1% business income, 2.5% retail VAT); BPN No. 8, No. 9
Financial responsibility / solvency	Próspera Financial Responsibility Statute § 2-2-76
Crypto payments / instruments	§ 5-1-139; RFSA AA No. 10
Regulated-activity boundary	RFSA framework (banking, MTB, public offerings, custody/ brokerage)

Article	Próspera / RCLC authority
Dispute resolution	Próspera Arbitration Statute § 2-1-37; Próspera Arbitration Center (pac.hn)
Registry fees (filing budget)	Entity Registry Filings fee schedule (Certificate of organization $150; annual report $100; foreign registration $50; registered agent $25)
